Serhii Stanislav

Front-end Developer

Since 2015 I developed websites in Webflow at freelance. These were simple projects using HTML/CSS. At the beginning of 2020, I started my studies at the GoIT school, where I had experience in teamwork and coding for over a year. I prefer to use React, Redux and JavaScript in development. In the stack of these technologies, I can be most effective as a front-end developer for remote work

Employment history

Front-end developer at Freelance

September 2020 - up to now
